Bacteria

Vi-

1	characteristics	Special qualities or appearances that make an individual or group of things different to others.
2	classify	To sort things into different groups.
3	taxonomist	A scientist who classifies different living things into categories.
4	key	A key is a series of questions about the characteristics of living things. A key is used to identify a living thing or decide which group it belongs to by answering 'yes' or 'no' questions.
5	Microorganisms	Microorganisms are viruses, bacteria, moulds and yeast. Some animals (dust mites) and plants (phytoplankton) are also microorganisms. Microorganisms are very tiny living things that can only be seen using a microscope. They can be found in and on our bodies, in the air, in water and on objects around us.
6	species	A group of animals that can reproduce to produce fertile offspring.
7	Fungi	Carl Linnaeus first published his system of classifying things as an adapted version of Aristotle's system: Fungi-aeus System
